

SMYTHSON ROTARY WATCH-BOX

£2,795, SMYTHSON.COM

This stylish grey calf-leather box is the perfect place for a watch-lover to place the object of his or her affections. The two compartments are installed with battery-oper-

ated rotary mechanisms, ensuring that your timepiece will always be fully wound. As well as keeping your watch safe from scratches, you can also lock it to keep the contents away from prying eyes (there are five cufflink boxes in there too).

NOMOS GLASHÜTTE
IN-HOUSE BUILT CALIBER DUW 3001

To the uninitiated, the above image may not mean an awful lot, but take our word for it: this is some serious horological technology. What you're looking at is Nomos Glashütte's in-house Caliber DUW 3001, an ultra-

thin, automatic movement that works with almost unbelievable precision. You can find it inside some of the prettiest "architect" watches on the market, such as the Nomos Minimatik, priced just £2,360. If you're shopping for a watch-nerd, you'll struggle to find quality like this for prices anywhere near this level. nomos-store.com
